SUMMARY

Full Stack Developer with **3 years of hands-on experience** in **Vue.js, Nuxt, Express.js, and NestJS**, focused on building scalable web applications and integrating with **AWS**.

TECHNICAL SKILLS

Frontend: Vue.js, Nuxt.js, Tailwind CSS

Backend: Node.js, NestJS, Express.js

Database: DynamoDB, MongoDB, PostgreSQL, Firebase

Cloud & Tools: AWS Services, Vite, GraphQL, Git

Languages: JavaScript, TypeScript, C, C++, Java

Other: SDK Development

EXPERIENCE

Full Stack Developer

Aug 2024 – Present

Z Strike

Remote

- Building a next-gen **authorization platform** using **Cedar policy language** integrated via WebAssembly for fine-grained access control.
- Developed the **Cedar Policy Playground** — an interactive Nuxt-based tool with syntax highlighting, validation, and policy visualization, prepared for open-source release.
- Designed a dynamic **DynamoDB architecture** supporting per-organization data isolation and scalable structure.
- Initiated cross-language **SDK development** starting with Node.js for seamless product integration.
- Driving end-to-end development in an **agile startup environment**, collaborating with designers and product managers while setting technical direction and coding standards.

Jr. Frontend Developer

Jan 2024 – Jul 2024

DevSoft UK LTD.

Remote

- Delivered **20+ major frontend features** and **30+ reusable components** for a tax automation platform used by 1,000+ accountants.
- Improved UI efficiency by **25%** via optimized state management and rendering performance.
- Integrated REST APIs for automated tax updates ensuring **100% compliance** across 3 regions.

Vue.js Frontend Trainee

Jan 2023 – Jun 2023

Simform Solutions

Ahmedabad, Gujarat

- Built responsive UIs using **Vue.js, Nuxt, and Firebase**, implementing authentication and serverless features.
- Strengthened fundamentals in TypeScript and modern frontend architecture.

PROJECTS

Cedar Authorization Tool (Nuxt.js, Express, DynamoDB, AWS) – Comprehensive authorization management system inspired by AWS Cedar, featuring centralized policy and entity management, real-time access evaluation, and fine-grained control for modern applications.

Cedar Policy Playground [🔗](#) (Nuxt.js, WebAssembly, Tailwind) – Interactive playground to visualize and test Cedar authorization policies against entities and schemas with live validation and syntax highlighting.

Rental Platform (React, Node.js, MongoDB) – User-to-user vehicle rental platform enabling listing, booking, and direct communication between renters and owners, with authentication and data management via REST APIs.

EDUCATION

Dharmsinh Desai University, Nadiad, Gujarat

2019 – 2023

B.Tech (Information Technology)

CPI: **8.46**
